

# GHOSTMAN ON 3RD

10.01.26

Liberty Edition

## NEW QUEEN IN TOWN

After 7 seasons,  
Jay will be missed!

PREDICTIONS  
FLIP CUP! RULES?  
NEWBIES

# GHOSTMAN ON THIRD

We couldn't have said it better our self!  
 We are so glad Kickball is back!  
 And even more excited it is warming up  
 so we can show off our hot body :)

There are a lot of new faces  
 which means more butts to kick  
 not only on the field,  
 but at the flip cup table!

## DO YOU HAVE WHAT IT TAKES?

### THIS WEEKS WINNERS WILL BE:

Two Girls One Flip Cup - because their name just sticks out in my mind for some reason.  
I just don't know why?! (Google it...but not if you ate recently...)

Dixie Nourmous - because they are going to want to defend their 1st place champion title from last season!!

We Got The Runs - I just want to find out if they really do have all the runs!

I'd Hit It - they are brand new team and have said they have never played before,  
but maybe that is a front so that we just THINK they are bad!

Menace To Sobriety - because this is our new Pres team and ghostie is going to go ahead and suck up now :-)

Pitching Without a Rubber vs Mike Hunt's A Home Run Hitter - well that's a toss up.  
I just hope Mike Hunt's isn't Pitching with out a Rubber...I'm still going to go with MH!

Balls Deep - because I think Carlos is still hot and bothered after their loss in the finals last season  
and that might affect their game.

Clifford's Big Red Balls - any team that just comes out and says they have big balls, deserve a chance to prove it!

### PLEASE REMEMBER:

According to Chapter 47 in the Texas Penal code, **GAMBLING** is illegal!

# Flip Cup! Rules?

Because we have so many new faces this season,  
GM feels it is my duty to make sure the seasoned  
Vets of Flip Cup don't KILL the newbies

For NOT knowing the rules as that would mean less people to hook up with!  
YES, THERE ARE RULES TO FLIP CUP:

A.

A rotationally symmetric flip cup with a uniform mass distribution

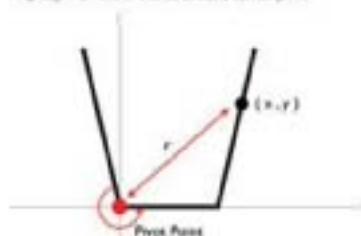

Line Density (mass / unit length) =  $\rho$   
 Total Mass (M) =  $\rho L \left[ 1 + \frac{4}{\sin(\theta)} \right]$   
 Centroid / Centre of Mass =  $\left( \frac{L}{2}, L \left[ \frac{4}{\sin(\theta)} + 4 \right] \right)$

Mathematica

B.

Flip cup moment of inertia about a corner pivot

The moment of inertia is defined as:  $I = \int r^2 dm$   
 For this cup, the moment of inertia about the indicated pivot is:

$$\frac{\rho L^3}{3} \left[ 1 + (4 - 24 \cos(\theta)) \cos(\theta) + 24 \cos^2(\theta) \right]$$

FOR THE LESS SMART.

5-7 people per Team

Challenging team BUYS THE BEER

NO BREAKS (no bathroom, phone calls, etc)

First team to 5 wins

Don't be left laying down...
